

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

FRIDAY, AUGUST 20, 1915.

## CONTENTS

<i>The American Association for the Advancement of Science:</i> —	
<i>Science and Civilization:</i> DR. W. W. CAMPBELL BELL .....	227
<i>Industrial Accident Statistics</i> .....	238
<i>The American Society of Aeronautic Engineers</i> .....	239
<i>The Organization of Scientific Research in Great Britain</i> .....	240
<i>Scientific Notes and News</i> .....	241
<i>University and Educational News</i> .....	243
<i>Discussion and Correspondence:</i> —	
<i>Public Health in America:</i> DR. HAROLD F. GRAY. <i>The Attitude of the State of California toward Scientific Research:</i> PROFESSOR WM. E. RITTER. <i>A Reply to Dr. Little:</i> MAUD SLYE .....	243
<i>Scientific Books:</i> —	
<i>Skinner on the Mathematical Theory of Investment:</i> PROFESSOR EDWIN BIDWELL WILSON. <i>Elliot on Prehistoric Man:</i> PROFESSOR GEORGE GRANT MACCURDY .....	248
<i>Notes on Meteorology and Climatology:</i> CHARLES F. BROOKS .....	251
<i>Special Articles:</i> —	
<i>On the Reproductive and Host Habits of Cuterebra and Dermatobia:</i> CHARLES H. T. TOWNSEND. <i>A Rapid Method of counting Bacteria in Milk:</i> W. D. FROST .....	253
<i>Societies and Academies:</i> —	
<i>The New Orleans Academy of Science:</i> PROFESSOR R. S. COCKS .....	256

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE<sup>1</sup> SCIENCE AND CIVILIZATION

THE American Association for the Advancement of Science is sixty-seven years old. It has held annual meetings successively in the eastern centers of population and education, from Boston to Denver and from New Orleans to Toronto. We are today opening the first meeting of the association west of the Rocky Mountains. It gives a more correct impression to note that the Denver meeting of 1901 and the San Francisco meeting are the only ones thus far held west of the Mississippi River cities—in the western three fifths of the United States. The San Francisco meeting has been appointed with the double purpose of encouraging the development of science in the Pacific region and of uniting with other organizations in celebrating the completion of the Panama Canal.

There could scarcely be a better illustration of the relations of science to civilization than the canal supplies. This great waterway has been constructed, not so much by the potency of our national wealth in gold, not so much by the wonderful engineering and administrative ability which we all delight to honor, as by the victory of pure and applied science over the sources of malarial and yellow fever infection. Three centuries of research in the various branches of biology, as pure sciences, inaugurated by Vesalius's anatomical dissections (about 1530), by Harvey's discovery of the circulation of the blood (about 1616), by Hooker's introduction of the
